

Monir Shadkani

Developer in artificial intelligence and data science · Toulouse, France

contact@monirshadkani.com · linkedin.com/in/monir-shadkani-b1a042192 · github.com/monirshadkani · monirshadkani.com

I design and build websites and applications, and I bring artificial intelligence into them where it is useful.

ABOUT

I first studied English literature in Tehran, then moved into software development. I live in Toulouse, where I work as a developer while continuing my studies in artificial intelligence.

I like websites that are clear, useful and carefully made.

PROJECTS

Le réflexe cueillette

A guide to foraging in France. It sets out, département by département, what the law says about picking wild mushrooms and berries, with a calendar of what grows in each season. I designed and developed the site, which is in French.

<https://reflexe-cueillette.fr>

The hall of a Persian bath-house

This site also holds a more personal piece of work: the hall of a Persian bath-house, rebuilt in three dimensions after the Sultan Amir Ahmad hammam in Kashan, Iran. You walk through it in your browser. The tiles were traced one by one from photographs of real tilework. The visit is better on a computer.

EDUCATION

Master's degree in computer science, track Traitement de l'information et exploitation des données (TRIED: data processing and analysis)

Cnam (IPST-Cnam), Toulouse · From November 2026, work-study

Bachelor-level professional qualification (RNCP level 6) in AI and data science development

EPSI Toulouse · 2023–2026

- Data science: ETL, data cleaning and analysis, visualisation.
- Predictive models: supervised and unsupervised machine learning.
- Project management: agile methods, technology watch.

Master's degree in English literature

Shahid Beheshti University, Tehran

Bachelor's degree in English literature

Shahid Beheshti University, Tehran
